Netherlands

Experienced frontend developer with 4 years of expertise in creating interactive web applications. Proficient in quickly learning and adapting to new technologies, I excel at understanding business requirements and transforming them into user-friendly software solutions. My skills include developing robust, scalable applications and working effectively in fast-paced environments. With a strong focus on delivering high-quality products, I bring both technical proficiency and a keen understanding of user experience to every project.

Skills

Frontend	HTML, CSS, Javascript, Typescript, React, NextJS, Tailwind CSS, Styled Components, SCSS/SASS, Bootstrap, Material UI
Backend	NodeJS, ExpressJS, NestJS, Python, Django, MongoDB, PostgreSQL
Other Technical Skills	NPM, Webpack, Redux, Git, Github, GitLab, REST, Jest

Work Experience

Frontend Developer • Perculus • İstanbul, TR

Aug 2022 - Jan 2023

Helping trainers and teachers to deliver more engaging, fun and collaborative training to achieve better learning outcome.

- Developed 5 unique real time and interactive applications, resulting increase in sales and customer satisfaction.
- Improved the functionality of an internal library which is used actively in development processes.
- Implemented performance optimizations on applications resulting in a 60% improvement in performance.
- Demonstrated strong project management skills, consistently delivering tasks on time and within budget.
- Teck Stack: Typescript, Javascript, React, Node.js, PostgreSQL, Socket.io, SCSS, Styled Components

Frontend Developer • Belderia • Gaziantep, TR

Aug 2020 - Aug 2022

A leading manufacturer of high-quality bicycles, I worked as a Frontend Developer where I was responsible for enhancing and maintaining the company's e-commerce platform.

- Made necessary enhancements for company's e-commerce platform.
- Resolved bugs resulting in a notable 50% increase in website traffic.
- Organized the digital presence resulting in a remarkable 200% increase in customer numbers.
- Teck Stack: HTML, CSS, Typescript, Javascript, React, SCSS

Volunteer

Tech Mentor • HackYourFuture

Mar 2024 - Present

HackYourFuture trains people with a refugee background to become web developers and software testers through a free seven month program.

- Code reviews for assignments submitted by students, providing feedback to help them improve their coding skills.
- Organizing coding sessions and workshops as needed.
- Mentoring students on best practices and coding standards to enhance their readiness for real-world projects.

Projects

URL Shortener

Jun 2024 - Jun 2024

The URL Shortener App is a powerful, easy-to-use web application designed to condense long URLs into compact, manageable links. Ideal for use on social media, emails, and other platforms where space is limited, this app provides a simple and efficient solution to streamline your online sharing experience.

- Javascript, React, MongoDB, Express.js, Node.js, Redux, Tailwind CSS

React Range Slider

May 2024 - May 2024

Developed an open-source, customizable, and responsive range slider component using React. This library allows users to select a range of values with an intuitive and visually appealing interface.

- Typescript, CSS, NPM, Docusaurus

Wind Guide

Jan 2024 - Jan 2024

Developed a full-stack application called Wind Guide, planned to visualize routing data and incorporate real-time wind conditions. This tool helps riders anticipate headwind or tailwind along their routes, enhancing their riding experience.

- Typescript, React, NestJS,

Aronya Aronia

Jan 2024 - Jan 2024

Developed a professional website for Aronya Aronia using WordPress. The site features a clean and modern layout, showcasing the brand's products and services. Key contributions include customizing themes, optimizing for SEO, and ensuring a responsive design for optimal viewing on all devices. This project highlights my skills in web development, content management, and user experience design.

- Wordpress

Kerem Board

Nov 2023 - Dec 2023

The Kerem Board project is a robust full-stack personal task management application designed to enhance task organization and tracking. Developed using the MERN stack (MongoDB, Express.js, React, Node.js), this application provides an intuitive and dynamic user experience for efficient task management.

- React, MongoDB, Express.js, Node.js, Typescript, Redux, Styled Components
